To Whom It May Concern,

I am writing to apply for the Graphic Designer position, for which I have included an up-to-date copy of my resume and portfolio.

As a Graphic Design student, I created branding packages for fictional businesses. This process included creating the logos, designing the stationary, and formatting a style guide for use by the business. I am proficient with Photoshop, Illustrator, InDesign, 3DS Max, Maya, and Mudbox.

I am enrolled at Southern New Hampshire University studying Graphic Design in an online setting. My schooling has taught me some great time management skills that I use to ensure my work gets done on time. These skills will allow me to easily take on the extra workload this position requires.

I believe I would be a great fit for the Graphic Design position. My work experience, customer support experience, and online learning experiences would all be beneficial to your company. I also believe this would be an amazing experience to expand my knowledge and skills with a company I enjoy!

Thank you for the opportunity and consideration.
